

## SELF SET DROGUE PACKING INSTRUCTIONS

Inspect every component during each pack job

- Step 1            Configure the system to self set drogue
- A)    Remove other deployment systems
  - B)    Attach light blue colored drogue & bridal to d-bag & top of canopy, tighten link ¼ turn past hand tight
  - C)    Replace broken retainer bands and tube stows on deployment bag (d-bag)
  - D)    Release front riser trim tabs completely
- Step 2            Place canopy in proper layout on left side with good line tension and alignment
- Step 3            Complete 6 line check  
Check rapid links and barrels
- Step 4            Untwist control lines and set deployment brakes
- A)    Insert white dacron loop thru control line cat eye
  - B)    Flip guide ring over dacron loop and insert toggle tip thru the loop
  - C)    Seat toggles on velcro
- RIGGER CHECK 1**
- E)    Stow excess control line in velcro wrap
- Step 5            Split nose 4 ½ cells to each side and roll inward
- Step 6            Fold canopy with line groups centered in fabric and on top of each other
- A)    Fold A lines half way to B lines then fold remainder on top of B lines
  - B)    C lines on A,B lines
  - C)    D lines on C,A,B lines
  - D)    Steering lines on D,C,A,B lines
  - E)    Clear stabilizers
  - F)    Flake tail and split at center cell label
  - G)    Ensure all lines are tight, centered and clear of fabric
- RIGGER CHECK 2**
- H)    Grasp the top center of the slider and carefully pull up the lines to the stops
  - I)    Carefully quarter slider up into canopy between line groups
- RIGGER CHECK 3**
- J)    Fold stabilizers and slider into two 45 degree angles
  - K)    Pull center of tail down and wrap around folded stabilizers
  - L)    Cocoon center cell tail fabric around canopy removing excess air

- M) Make small S fold with slider grommets sitting on top
- N) S fold remaining canopy on top of slider grommets (against knees)
- O) Expose ring at top of canopy where bridal attaches by folding fabric into top fold

Step 7 Pull d-bag over canopy while maintaining folds and preventing air from seeping in

- A) Make first three locking stows of suspension lines using black tube stows (center first)
- B) Make next two locking stows thru loops using tandem retainer bands (single wrap)

**RIGGER CHECK 4**

- C) Stow remaining suspension lines leaving approximately 18" above risers

Step 8 Bring the d-bag over the container

- A) Stow the risers with the toggles toward the reserve container
- B) Place a pack buddy or spectra pull-up cord thru the closing loop
- C) Cock the drogue inner bridal kill line so that green mark is visible

**RIGGER CHECK 5**

- D) Place d-bag in main container, orient disk in position with arrow pointing up and expose straight closing pin
- E) Route closing loop **COUNTER** clockwise thru main flap d-rings (match diagram on flap)
- F) Insert straight closing pin thru closing loop twist free (match diagram)
- G) Insert locking pin into closing pin and seat completely
- H) Ensure green mark on inner bridal kill line shows in window thru outer drogue bridal

**RIGGER CHECK 6**

- I) Lay drogue out flat next to the opening of the spandex pouch (mesh side up)
- J) S fold bridal on top of mesh from center to edge nearest container, leave approximately 18" from edge of drogue to disk
- K) Fold drogue in half over stacked bridal (making a half circle)
- L) Fold drogue in thirds ensuring that the drogue bridle exits the center of the folds
- M) Fold drogue just past half way, with orange handle on exposed bridal
- N) Roll the sides of the drogue into the center keeping mesh away from orange handle
- O) Insert drogue into larger spandex pouch on bottom of container with handle exposed
- P) Tuck remaining exposed bridal under right main container flap
- Q) Tuck upper cover flap in place, close main closing pin protector flap & bottom tuck tabs

Step 9 Log pack job in rig card and log sheet

**RIGGER CHECK 7**
